

# BlocOut

Award winning blind, the BlocOut is capable of blocking light and draughts thanks to the exceptional quality of its individual components. Each part, from the brush seals to the cassette holder and aluminium frames are designed to last. BlocOut blinds come in a wide range of colours and patterns to suit a variety of environments and tastes.

Curtains

BlocOut

Curtains trap hot air and prevent it circulating the room. This can lead to heat loss. BlocOut creates an energy efficient barrier that minimizes heat loss through the window and leaves radiators free to heat a room faster.

## Aluminium Colour Options

**Anodised Silver**  
Natural Finish

**White**  
Matt Finish

## Features

Bloc Blinds incorporate a number of specially developed features that enhance the premium quality of our blinds;

### Cassette

The fabric which is around the spring and barrel mechanism is completely enclosed, the siderails slot into cassette ends on installation.

### Child Safe

The blind is operated via a spring system. The blind pulls down through the siderails locking in place when the handle is released. The handle is then pushed in towards the window releasing the lock which enables the spring to retract the fabric. There are no cords.

### Seal

Brush and rubber seals are attached to the bottom of the handle, when the blind is closed, they create a barrier between the blind and sill, blocking out light and reducing heat loss.

### Pips

Pips are attached to the fabric to ensure the blinds stays securely within the runners at all times.

### Brush Seals

These create a barrier between the blind and the window frame, blocking out light and reducing heat loss.

## Fixing Components

Left & right Guide Dogs for edge of recess fix.  
Height 32mm, Width 45mm, Depth 8mm

3 white primed 9mm x 44mm wooden batons  
used in the inside of recess fix only.

## Fixing Components in position

Edge of Recess.

Inside the Recess.

## Fitting types

## Product Dimensions

- A. Cassette height: 60mm
- B. Frame width: 32mm
- C. Cassette depth: 52mm

### PRODUCT SIZE LIMITS

- Min width: 400mm
- Max width: 1800mm
- Min drop: 300mm
- Max drop: 1500mm

## Product tolerance limits

To ensure correct operation and full bloc out performance the blind can only work within limited window reveal tolerances i.e. the window must be as square as possible, fitting a blind into or on the edge of a window recess outside of the stated tolerances will lead to poor operation, reduced bloc out performance and or product damage.

The cassette will always be made to the top width (A)

The siderails will always be made to the smallest height

The middle width (B) and the bottom width (C) can have no more than - 2mm variation from the top width

Bottom width (C) can have no more than +/- 6mm variation from the top width

The height measurements (D) (E) (F) must not have a variation of more than +/- 5mm.

## Operation

The blind is operated via a spring tension system using the handle at the bottom of the blind. The blind simply pulls down through the siderails locking whenever the handle is released, the handle is then pushed in towards the window releasing the lock which enables the cassette to retract the fabric. To ensure correct operation the user must operate the blind with 2 hands held centrally on the handle not to one side of the blind. To ensure fabric does not come out of the siderails keep the window closed when the blind is in the closed position.

## Care

To keep the blind looking it's best through time the customer must ensure the product has been installed and operated securely and correctly, the fabric can be cleaned with a synthetic or feather duster and can be wiped lightly with a damp cloth.

## Maintenance

All our products are manufactured using aluminium and glass reinforced nylon components, they do not present any corrosion problems in normal working environments. If there is a failure of a blind, a component can be replaced without the need for a new complete blind.

## Replaceable components:

- Handle ends (brakes)
- Siderail feet
- Siderails
